

AlphaLift WB-115

From Complus Trading North America LLC

Usage Instructions

FOR DOWN HOLE AND PIPELINE CLEAN UP OF PARAFFIN.

Complus Trading North America LLC, offers multiple Nano products to help increase and sustain well production for well struggling with paraffin build up down hole.

AlphaLift WB-115 helps pry paraffin off the tubing, pump and screens, allowing oil to flow unrestricted by paraffin build up. Our special particles will remain attached in the tubing as long as it is continuously pumped. This helps keep production numbers at their highest.

Our AlphaLift WB-115. It is a water base nano with surfactant used in down hole & pipeline applications for oil only pipelines as well as oil, water, and Gas pipelines. The treatment rates are generally 250 to 500 ppm. Methanol can be added for freeze protection of the product.

This product can be used as a pipeline friction reducer due to its physical characteristic.

Available in totes and drums.
