CORPORATE METHODOLOGY

The trading of commodities has been in existence since time immemorial. From the earliest recorded history, Europe has been conducting commercial trade with its neighboring countries and has continued to expand on a global basis.

The trading of commodities has flourished over the centuries to become a global economic linchpin and a barometer for economic climates that can influence interest rates, currency values, governmental policies, and political conflicts.

At COMPLUS SYSTEMS GROUP the approach to trading of commodities is transparent and non-complicated and managed by a proper division named Complus Systems Group. We progress each deal into the banking system as early as possible. This offers to Buyers the comforts that their transaction will be managed within compliance and regulations of banking systems for a smooth effortless closing.

ABOUT US

Complus Systems Group, an independent trading and manufacturing firm founded on 2006, based in Tallinn, Estonia, Milan, Italy, and in North America, focused on mainly six business divisions: Trading of Oil & Gas products as well as Energy Saving Products, Petrochemical products (HDPE, LDPE and PP), Chemical products production and sales, Innovation Technology and Business Services. Our global relationships enable us to offer sustainable contracts with qualified clients and counterparties. Complus Systems Group is a company whose business model is rooted in a similar historical base with companies such as Italy's ones (company owners are Italians), but with a clear 21st century vision as to how the changing technological demands in our global society have altered the economic and political landscape to create unique opportunities.

At Complus Systems Group, our diverse background and ethos encompass both Western and Eastern cultures. The combined disciplines enable us to effectively communicate with and maintain key relationships to true qualified Suppliers and Buyers. Combined with our long experience in the legal, financial and banking industries as well as high tech. industries, Complus Systems Group offers a sustainable "bridge" in conducting business into Europe, Asia and USA.

PRESENCE

Specific to this regard, Complus Systems Group continues to establish its presence primarily in Europe (Estonia, Italy and Switzerland) and have independent representatives in Russia, China, Taiwan, and USA.

COMMODITIES

Commodity transactions have two critical factors that must be managed effectively in today's global markets. Often transactions fail to conclude because Sellers and Buyers could not reach accord; politics have a role in breaking down common sense; or trust factors have not been established. Complus Systems Group through its global approach, management skills and technical know-how can offer transactions a *simplified* deal flow. Our diverse relationships and banking interactions

are key to success as we are geared to minimize potential risks and discord between bona fide Suppliers and Buyers.

KEY TO MARKETS

Our main focus is to get each transaction to reach the banking level as early as possible. We deal directly with upstream suppliers irrespective of the asset class being considered. Complus Systems Group management and their relationships with consortium firms are seasoned veterans in their respective fields of operations. Management professionalism coupled with cultural efficiencies, experience and an acute understanding of market space is the key to successful transactions. **Starting from November 2015, Complus Systems Group has started the accreditation with the Russian Federation and in particular the agreement will give to Complus Systems Group the opportunity to access all the oil and gas products produced in Russia.**

Complus Systems Group primarily trades Oil& Gas products from oil **major companies** to qualified selected buyers. Products can be delivered on a FOB or CIF basis to destinations (AWSP) required by the Buyers.

EXPERIENCE AND SKILLS

Through our relationships and interactions with some of the world major OIL SUPPLIERS and TRADERS, qualified transactions are managed within a properly regulated banking environment at the onset. Complus Systems Group banking relationships extend through to our wholly owned subsidiaries in Italy and Switzerland and North America. The personnel at Complus Systems Group have a shared cumulative experience in Trading, Marketing, Sales, Technology, Legal, Banking, Securities management and commercial banking in excess of 30+ years.

PRODUCTS

Through our global network alliances, we are able to cause deliverable off take contracts for buyers that meet the requirements as global buyers. Predominantly the OIL suppliers engaged by Complus Systems Group are Upstream Suppliers and accredited entities with a proven track record. Complus Systems Group focuses on five (5) major commodity classes that are basic staples required in today's global economies;

- Energy Products
- Natural Resources & Mining
- Green Energy
- Petrochemical
- Chemical Production

Energy Products:

- Crude Oil
- Gas Oil
- Fuel Oil
- Aviation Fuel
- LNG/LPG

Natural Resources & Mining

- Iron Ore
- Coal
- Copper

Green Energy:

- Design and Production of LED Lights
- Production of Graphene

Petrochemical:

- Recycled HDPE
- Recycled PP
- Recycled LDPE

PRODUCTION CHEMICALS CUSTOM BLENDED BY A HIGHLY-SKILLED TEAM

Contaminants and other issues such as paraffin, emulsion, corrosion or scale can cause production to halt. When that happens, Complus Equipment & Chemical, the Chemical division of Complus Systems Group, is here to help. Our line of custom blended production chemicals combined with our more than 85 years of experience in the oil & gas industry, professionalism and a highly-trained service team makes all the difference. We keep your wells flowing at maximum capacity with the greatest efficiency and at the lowest possible cost without sacrificing quality.

Our extensive product line includes but is not limited to:

- Demulsifiers
- Paraffin inhibitors
- Paraffin dispersants
- Defoamers
- Water clarifiers
- Scale inhibitors
- Corrosion inhibitors
- Biocides
- Surfactant acids
- Oxygen scavengers
- Hydrogen sulfide scavengers
- Carbon dioxide scavengers
- Foamers
- Soap sticks
- Salt inhibitors
- Hydrate inhibitors
- Flow-enhancement products
- Specialty products and more
- Bio-Remediate products

Complus Systems Group administers its technical skills and appropriate banking relations to get the transactions into the bank scope at the earliest onset of contracts. This model allows the comforts to be generated for all parties involved and cause the required elimination of the “unknown and uncertainties” in the commodity segment. Market realities are a key focus for Complus Systems Group where the fundamental of trades are established.

CLIENTELE

Complus Systems Group has key focus of service related to SOE (State Owned Enterprises), quasi parastatal corporations and certain pre-qualified private commercial buyers. The key focus and requirements that Complus Systems Group looks for with clients are their experience in “corporate” trade market setting. It is the belief at Complus Systems Group that one must have a working knowledge and experience within the field to properly manage the requirements of trade. At present most of the clientele currently engaged with Complus Systems Group are SOE Firms acting on behalf of their respective governments. The private sector clientele is for better part “ex industry veterans” that have knowledge and active trade experiences in their respective fields of operations.

Clientele qualifications are simple and straightforward; all that is required to start the ball rolling is that the client must issue their intent to purchase; from there Complus Systems Group will engage its standard KYC and DD Process.
